Bucket overview

AWS Region US East (N. Virginia) us-east-1

Amazon Resource Name (ARN) [arn:aws:s3::business-raw-riz](#)

Creation date March 3, 2025, 23:45:36 (UTC-08:00)

Bucket Versioning

Versioning is a means of keeping multiple variants of an object in the same bucket. You can use versioning to preserve, retrieve, and restore every version of every object stored in your Amazon S3 bucket. With versioning, you can easily recover from both unintended user actions and application failures. [Learn more](#)

Bucket Versioning Enabled

Multi-factor authentication (MFA) delete

An additional layer of security that requires multi-factor authentication for changing Bucket Versioning settings and permanently deleting object versions. To modify MFA delete settings, use the AWS CLI, AWS SDK, or the Amazon S3 REST API. [Learn more](#)

Disabled

Tags (0)

You can use bucket tags to track storage costs and organize buckets. [Learn more](#)

Key Value

No tags associated with this resource.

Amazon S3 > Buckets > business-raw-riz

There are no lifecycle rules for this bucket.

Create lifecycle rule

Replication rules (1)

Use replication rules to define options you want Amazon S3 to apply during replication such as server-side encryption, replica ownership, transitioning replicas to another storage class, and more. [Learn more](#)

Replication rule name	Status	Destination bucket	Destination Region	Priority	Scope	Storage class	Replica owner	Replication Time Control	KMS-encrypted objects (SSE-KMS or DSSE-KMS)	Remove replicated objects
bus-lic-rep-rul-riz	Enabled	s3://business-raw-bac-riz	US East (N. Virginia) us-east-1	0	Entire bucket	Same as source	Same as source	Disabled	Replicate	Disable

[View replication configuration](#)

Inventory configurations (0)

You can create inventory configurations on a bucket to generate a flat file list of your objects and metadata. These scheduled reports can include all objects in the bucket or be limited to a shared prefix. [Learn more](#)

Name	Status	Scope	Destination	Frequency	Last export	Format
No configurations						
No configurations to display

The screenshot shows a web browser with multiple tabs. The active tab displays the AWS console URL: `us-east-1.console.aws.amazon.com/s3/buckets/business-trf-riz?region=us-east-1&bucketType=general&prefix=business_license/license-status/Quali...`. The browser's address bar also shows the domain `aws.amazon.com` and the search bar contains the text `Search`. The browser's bookmark bar shows several bookmarks, including `Amazon S3`, `Buckets`, `business-trf-riz`, `business_license/`, `license-status/`, `Quality Check/`, and `passed/`. The browser's status bar at the bottom shows the location `United States (N. Virginia)` and the user's profile `voclabs/user3764969=rizwan @ 9850-3825-9447`.
